Define your problem statement

Plasma helps people with cancer, rare disorders, immune system problems, and genetic anomalies. During the COVID 19 crisis, the need for plasma increased, while the number of donors significantly reduced. It would be beneficial to save the donor information so that the list of current donors might be informed in order to help the less fortunate.

PROBLEM

In order to address the issue, a web application can be developed that will gather donor data, store it, and make it available upon request.
